

LUXEMBOURG

Women's programme

In the prisons of Luxembourg there are no specific programmes for women who have suffered gender violence within intimate partnerships and are in prison.

Men's programme

In the prison of Luxembourg there are no specific programmes for men who have committed gender violence within intimate partnerships and are in prison.

However, the penitentiary centre of Givenich has a programme targeting violent behaviours. The participation in the programmes is voluntary based. The Psycho-Social-Educational Service will implement a programme on accompanying violent inmates. The programme has 3 main axes. Two of them are based on direct intervention with the inmate, focusing on prevention of relapse and monitoring inmate's psychocriminology. The third one is more related with creating network with other existing services.
